

Warranty and Planting Instructions

The free, complimentary conditional 6 month warranty

Includes a 1 time tree replacement and shipping of the replacement tree if you used us to ship the original tree.

The optional extended 18 month warranty*

Includes a 1 time tree replacement and shipping of you used us to ship the original tree.

*Extended warranty must be purchased when the original tree is purchased and is not available for double and triple extra large trees.

Important: All trees must be planted on the day of arrival and the following instructions must be followed or the warranty will be void.

Hole Preparation & Planting

6 to 10 inches of gravel must be placed in the bottom of the planting hole.

Small trees	Dig a 48+ inch square hole, 24 inches deep after 6 inches of gravel has been added
Medium trees	Dig a 72+ inch square hole, 24 inches deep after 6 inches of gravel has been added
Large & X-Large	Dig a 84+ inch square hole, 24 inches deep after 6 inches of gravel has been added
XX-Large & XXX-Large trees	Dig a 120+ inch square hole, 24 inches deep after 6 inches of gravel has been added (*Extended warranty not available on these size trees)

Step 1: Remove the plastic completely.

Step 2: Leave the burlap on and set the tree in place.

Step 3: Peel off the burlap and leave it in hole.

Step 4: Water in the tree while back filling with CLEAN FILL DIRT. Make it muddy around the tree so that the dirt flows under the tree and fills in all the air pockets.

Step 5: Build a 6 inch tall berm around the tree 2 to 3 feet from the trunk.

Watering

For the warranty to be valid there must be a drip system installed on top of the rootball, inside of the berm, which emits 5 gallons of water per hour. When the weather is cooler than 90 degrees, water once a week using the drip system for 10-15 hours. If it's 90 degrees or hotter, water using the drip system twice a week for 10-15 hours. Every 3 months spread 32 oz. of Triple 15 in the berm area. You may use Blood & Bone meal to fertilize. Only use Triple 15 after you have compacted the soil around the tree.

1. Your warranty is void if you do not plant the tree the day it arrives.
2. Your warranty is void if you do not follow our planting instructions.
3. Your warranty is void if you do not follow our watering instructions.
4. Your warranty is void if you leave the plastic in the hole.
5. Your warranty is void if you use an underground watering system. Your tree needs to be watered from the top down. 30% of B&B trees with underground watering systems die.
6. Your warranty is void if you add fertilizer to your soil when you back fill. You can use fertilizer after you have compacted the new soil around the tree.
7. Your warranty is void if you do not put 6 to 10 inches of gravel under your tree.
