

Olive Tree Install

Small = 5 ft
Med/lrg/XL = 8 ft
XXL / Giant = 10-11 ft

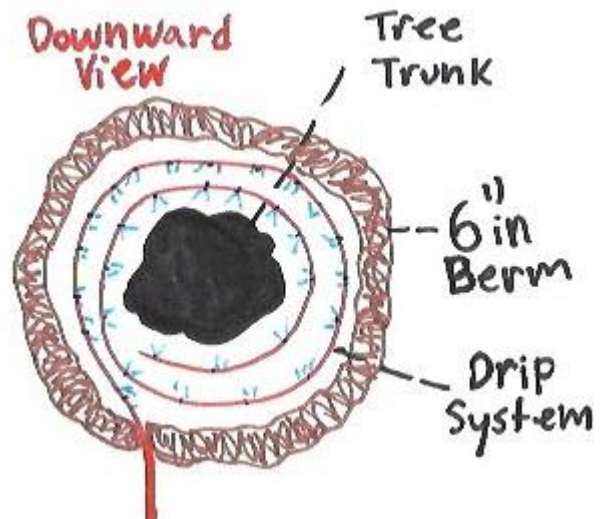

Side View

6" in Berm
just outside of the
root ball

Downward View

Install Instructions

1. Dig a hole sized to fit the tree (see back side)
2. Put 6 inches of gravel in the hole leaving 24 inches of free space for the tree
3. Remove plastic from Tree
4. Leave burlap on & set tree in place
5. Peel off the burlap & leave in the hole
6. Water the tree while backfilling the hole. Make sure it's muddy around the tree so dirt flows under the tree and fills air pockets
7. Build a 6 inch tall berm around the tree (see back side) 2ft to 3ft around the trunk

Care Instructions

- Water 1 time a week by filling the berm with 40 gallons of water, slowly over a 24 hour period (using a drip system, see back side)
- Every 3 months spread 32oz of Triple 15 in berm area. You may use Blood and Bone Meal or Super Thrive to fertilize instead. (Only use Triple 15 or Super Thrive after the soil has been compacted)

Warranty is Void if

Warranty is Void if You leave plastic on or in the hole.

Warranty is Void if You use an underground watering system.

(Tree must be watered from top down. 30% of B&B trees with underground watering die)

Warranty is Void if You add fertilizer to your soil when you back fill.

(You can add fertilizer after you compact the new soil around the tree)

Warranty is Void if You don't put gravel under the tree

Warranty is Void if You don't plant the tree the day of shipment
